ST. HELENS, NOVEMBER 20, 1891.

THE man who would be most suc cessful is the one that lays a solid ndation to build upon and then sticks to it, leaving everybody else's business alone but his own.

VILLARD, in his speech in Portland said the Union Pacific railroad was doomed, and intimated that the government would have to take it for the debt due it in a few years. Probably when the government gets in the railroad business there will be less scheming, less talking, less extortion, and greater prosperity to the railroads and the people.—Pendleton East Ore-

THE announcement of the engagemant of Senator Mitchell's daughter to a French "duke" will not inspire any great admiration for the young lady's body else on this side of the water. He is only a toy duke anyway-a relic of the times before France arose to the dignity of a republic. It is only among the vary weak minded and extremely shallow people in America that any sort of respect is entertained for empty titles -Statesman.

SECRETARY Rosk, in his third annual report, estimates the increase in the value of the agricultural product over last year to be not less than \$700,000,-000. He states that during the first three months of the present fiscal year the exports in cereal aggregated \$76,000,000, adding that the indications now are that the exports this year will largely exceed those of any previous year. He notes an increase, by some \$28. 000,000, in the imports of agricultural products during the first ten months. The secretary says:

WE see by the Pget Sound papers they are still antagonistic towards the commerce of the Columbia, and describe the entrance as uneafe for any sea-going vessel. The fact is, the difin connection with the bar have been removed, and the river is as good harbor as any on the coast. The press of our neighboring state claim that the Sound has received the largest portion of the wheat export of the open river nearly all the grain raised ould seek a market by way of the Columbia river, and this will be realized in a few years.

Ir ever a state official was kept on the grid-iron, it is Lieutenant Governor Laughton, of Washington. He is naged from some quarter all the ne. First, they have him resigned; then bound to stick to his office; and now there is a discussion as to whether or not a special session of the legislature could end his official life; with a preponderance of legal opinion in the ffirmative. To say the least, his lot cannot be a very happy one, unless, as may be the case—he has made, in his own mind, a margin for all that may be said, and considers that in the end the books will balance in his favor a between honors and abuses.

The Oregonian, at great expense has prepared a sectional map of Oregon, and offers it as a premium for becriptions to the Weekly Oregonian. The map is corrected up to date, is 40x50 inches in size; scale, six miles to the inch. It is neatly finished and on rollers, ready to hang up on the wall. This is the finest map of Oregon ever issued, and should be in every schold in the state. Anyone sending \$3.00 will receive the Weekly Ore gonian for fifteen months (if the sub scription is received prior to January 1. 1892.) and one of these maps as premium. The price of the map with out the paper is \$2.00. Adress : Oregonian Publishing Co., Portland, Or.

THE bridge question is about al you can hear on the streets of Portland these days. It is an actual fact that the people of that city will walk a mile to save five cents. The free bridge at Madison street gets all the travel, and at the Morrison street bridge there is no sign of activity except the street railway's business Last Friday there crossed on the free bridge over 1000 teams and over 4000 destrians, making a total of about \$450, had the regular fare been charged. This amount, daily saved to the people of the two cities, the principal portion of which are day laborers, is etter in the hands of those who are the bone and sinew of the country than to the rich corporation who have not heeitated to demand about 100 per cent, on their investment. Portland should either buy the Morrison street bridge or else build one in the vicinity say about Oak or Pine street. As a matter of fact there is at present ugh bridges across the river at Port land; but none of them are of sufficleat strength or capacity. The commerce of the city is greatly damaged the bridges. The steamers charge \$10 each for towing ships through the draws-\$30 for the three-and this prevents vessels of large capacity from ng to the upper part of the city. They will not pass through the bridges if it is possible to avoid it.

### The Aphia and Scale

Several specimens of vegetation attaked by the woolly aphis were shown at The Telegram officethis morning by W. H Brown, of Seattle. Among the specimens was a branch of an apple tree, which was litterally covered with thousands of these diminutive creat ures. It appeared to be covered with an encrescence of a purple color, but the use of a magnifier at once reduced this to a struggling mass of insects, very much similar to the comon tumble bogand all busily engaged in devouring their part of the branch. They multiply very rapidly and numerous young ones were mingled with the others in their attempts to obtain food. This insect attacks only the bark and sap, and by a recitation and assistance in produces large knots over the entire tree, in time resulting in its death. Specimens of the San Jose scale were again and bring others with them. fruit, and causes death within from min in the localities treated. His mode fore the public.-Telegram.

TAYLOR'S ONE SPOON

Dr. Price gives larger and fuller cans than those of any other Baking Powder manufacturer.

Above cut represents the comparative size of one pound can each Dr. Price's," Royal" and "Taylor's One Spoon." These cans were et side by side, then photographed down in exact proportions to admit the plate in this space. Ask your grocer to set a one pound can of any other brand alongside 1 lb. Dr. Price's Cream Baking Powder, and observe the difference, as illustrated above.

Adulterated powders may usually be detected by their heavier bulk, as shown by the small cans, and these scantily filled, often containing a circular to help fill out the cans. It is a singular fact that many of the ammonia and alum baking powders are advertised as "Absolutely Pure," All official examinations prove that it would be safe to reject all powders labeled absolutely pure.

The economy in using Dr. Price's Cream Baking Powder does not consist alone in the fact that much larger and fuller cans are given, but Dr. Price's is a stronger, purer and more wholesome baking powder than any other known. Does better work, and goes farther, hence more economical in every way.

What woman would use an ammonia or alum baking powder if she knew it? Such powders not only undermine the health, but ammonia gives to the complexion a sallow and blotched appearance.

Dr. Price's Cream Baking Powder is reported by all Now, in pursuance of said decree and order of sale, I will, on Saturday the 28th day of November, 1891, at the hour of 10 o'clock A. M., at the courthouse door in said county and state, sell the above described real property at public succion to the highest bidder therefor, for each, to satisfy said decree and order of sale.
